

Rose Medical Trade

Your Trusted Source for Alton's Sterile Disposable Endoscopic Accessories

Rose Medical Trade is a proud supplier of Alton (Shanghai) Medical Instruments Co., Ltd.'s comprehensive range of disposable endoscopic accessories. These accessories are engineered to optimize performance, enhance patient safety, and improve cost-efficiency in modern endoscopy.

As an ISO 13485-certified and FDA-registered company specializing in medical device manufacturing since 1998, Rose Medical Trade ensures that Alton's single-use instruments are supplied sterile, eliminating the risk of cross-contamination and ensuring the highest standards of hygiene.

Prioritizing Patient Well-being:

The Benefits of Sterile, Single-Use Instruments

Enhanced Safety: The single-use design eliminates the risk of cross-contamination, ensuring optimal patient protection. By reducing the risk of patient infections, clinics can lower the costs associated with post-operative complications.

Cost-Effective: Reduces costs associated with sterilization, disinfectants, and autoclaves.

Ready to Use: Eliminates wait times associated with autoclaving.

Consistent Quality: Ensures that the quality and properties of the equipment are not compromised by repeated exposure to pressure, steam, or high temperatures.

Comprehensive Range:

- Biopsy Products
- ERCP Instruments
- EMR Instruments
- ESD Instruments
- Grasping Forceps
- Hemoclips
- Retrieval Baskets
- Other Products
